Examiner, Art Unit 2617

REASONS FOR ALLOWANCE

1. This action is in response to the amendment and arguments filed on 2/01/2010.
 - (a) Claims 1, 11 and 22 have been amended.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Emmanuel Coffey on February 16, 2010.

The application has been amended as follows:

In claim 1, line 1, "A method, comprising:" has been replaced with "--A method for optimally provisioning connectivity for network-based mobile virtual private network (VPN) services, the method comprising a network service provider for:--.

Allowable Subject Matter

3. Claims 1-22 are allowed over the prior art.

The following is a statement of reasons for the indication of allowable subject matter:

In the Examiner's opinion, the prior art of record either singularly or in proper combination fails to teach selecting a subset of Internet Protocol Service Gateways (IPSGs) to maximize total profit by: determining network parameters, formulating aggregate costs per customer and solving an optimization problem for integer variable S_{ijk} , Z_{jk} such that profit is maximized, wherein the cost per customer includes the total tunnel bandwidth cost from each Mobile Access Point (MAP) to the Customer Premise Equipment (CPE) and the cost of provisioning an IPSG node.

Lor et al (US Patent Publication No. 2004/0068668 A1), Zargham et al (US Patent Publication No. 2003/0229613 A1), Allen et al (US Patent No. 7,136,386 B2) and

Chang et al (US Patent Publication No. 2003/0095542 A1) in combination disclose selecting a subset of IPSGs in a manner that maximizes total profit, wherein the cost per customer includes the total tunnel bandwidth cost from each MAP to CPE and the cost of provisioning an IPSG node.

However, the cited references fail to teach the claimed limitations of a network service provider determining network parameters, formulating aggregate costs per customer and solving an optimization problem for for integer variable S_{ijk} , Z_{jk} such that profit is maximized. Therefore, the prior art of record either singularly or in combination fails to teach the above claimed limitations for claims 1, 11 and 22 and is therefore the reason for allowance. Claims 2-10 are dependant on claim 1 and claims 12-21 are dependent on claim 11; therefore, the dependent claims are allowed under the same reasons set forth above.

Conclusion

4. The prior art not relied upon but considered pertinent to applicant's disclosure is made of record and listed on form PTO-892.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TANGELA T. CHAMBERS whose telephone number is (571)270-3168. The examiner can normally be reached on Monday through Thursday, 10:00am-6:30pm Eastern Time.
